

INAVHUB WIFI ROUTER AND NMEA WIFI SERVER

Brand: Digital Yacht
Product Code: INAVHUB WIFI ROUTER
AND NMEA WIFI SERVER
Call for Price: 07 3277 0237

Description

“Your on board wireless hub with NMEA interface for navigation systems and WAN interface for internet access devices such as our WL510. Step on board and connect and you’ll have one network with all your data.”

iNAVHub combines wireless networking and wireless NMEA data transfer in one simple to install box. Similar to our popular iNavConnect product, it creates a wireless network onboard the boat that any wireless device can connect to.

Once connected, iPhones, iPads, PCs and Macs, can receive NMEA0183 data wirelessly for use in iNavX and other navigation apps, whilst also sharing the long range internet connection created by Digital Yacht’s WL510 product.

iNAVHub is designed to fully integrate with Digital Yacht’s latest WL510 long range Wi-Fi adaptor. Simply plug the WL510 into the dedicated network socket and when you arrive in port and connect the WL510 to the marina’s hotspot, and everyone on board will be able to share the long range internet connection.

FEATURES

- 12/24v DC Powered Wireless Hub
- All-in-one solution for distributing your wireless internet and NMEA data
