AIS100 RECEIVER (USB)

Brand: Digital Yacht
Product Code: AIS100
Call for Price: 07 3277 0237

Description

“Perfect for PC based navigation systems with USB drivers for PC, MAC and linux.”

This value priced, entry level AIS receiver is Digital Yacht’s most cost effective solution for getting AIS on your PC. Featuring the same dual channel receiver as the AIS100Pro, but without the NMEA 0183 Output and multiplexer, there is no compromise on performance and the AIS100USB will out-perform all other, inferior, single channel receivers.

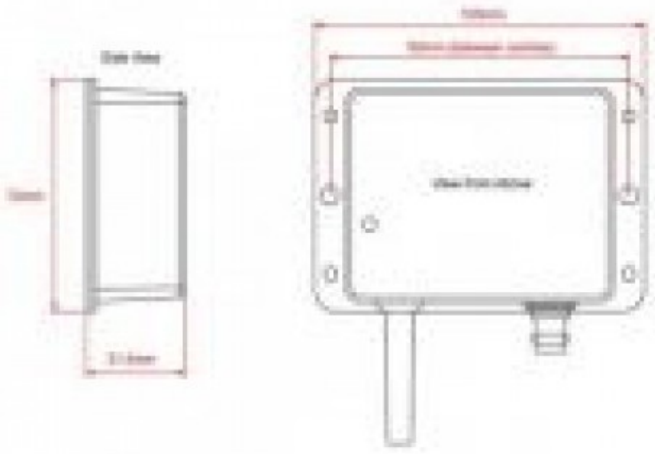

Simple plug and play USB connection to a PC. Uses standard drivers built-in to Windows XP/Vista/7 and is automatically mapped to an available “virtual” com port, which your PC software can read. Also compatible with Mac OS X and all LINUX Kernels since V2.4.20.

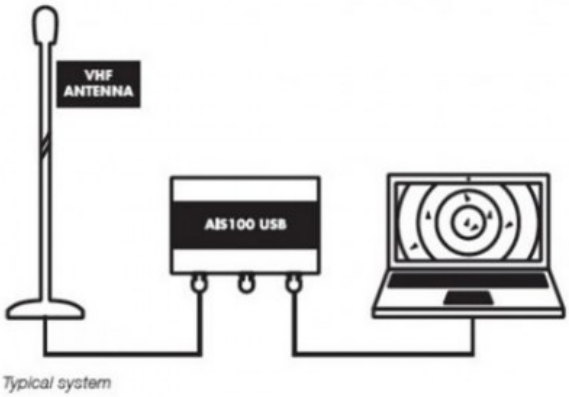

For use with any AIS compatible PC navigation software, such as the latest SmarterTrack, MaxSea, SeaPro, Nobeltec and RosePoint applications.

FEATURES

- Low cost entry level AIS receiver
- High performance dual-channel AIS receiver for use with AIS compatible PC navigation software
- USB Interface for simple Plug and Play connection to a PC
- Requires VHF / AIS antenna or splitter
- Easy to install IP54 black box solution
