

WL60 WI-FI BOOSTER (MK 3 VERSION)

Brand: Digital Yacht
Product Code: WL60
Call for Price: 07 3277 0237

Description

“Just missing that network connection – the WL60 will significantly increase the Wi-Fi range of your laptop with easy USB connection cable and sucker cup mounting solution”

This compact all-in-one system features a 100mW modem built in to a hi-gain (8dBm) antenna with a 5m (16ft) USB cable. The antenna measures 60cm (2ft) and should boost your Wi-Fi range to over 0.5 mile in perfect conditions.

Designed for quick and easy installation with four suction cups, the WL60 is an ideal temporary mount Wi-Fi solution for boats, caravans, RVs etc.

The WL60 connects to an on board PC through a regular USB connection with a plug ‘n’ play driver disk supplied for Windows XP/Vista/7/8/10, Mac OS X 10.3 up to the latest 10.9 (Mavericks) and latest LINUX (including Raspberry Pi) operating systems. It supports 802.11b/g/n protocols as well as WEP and WPA/WPA2 encryption.

Even if your system already has Wi-Fi access, this can be disabled and you can take advantage of the superior range (and speed) that this system will offer.

Wi-Fi range depends on many local factors, but Digital Yacht has seen ranges of up to 1 km with this low cost system. In general, using an internal Wi-Fi adaptor typically found on a notebook, you’ll be lucky to find the signal at the end of the dock, so if you plan to access the internet whilst on board, the WL60 could be the solution for you.

FEATURES

- New 802.11n 100mW Wi-Fi modem
- High gain (8dBm) omni-directional antenna
- 4 x suction cup mount
- USB bus powered
- Windows XP/Vista/7/8/10 compatible
- Compatible with Mac OSX, including the latest Mavericks 10.9
- Not compatible with Mac version above the 10.10 (it works with the [iKConnect](#))
- Successfully tested with most popular LINUX distros including Raspberry Pi
