

DIGITAL YACHT DTV100 with dual TV output and 20m cable

Brand: Digital Yacht
Product Code: DTV100
Call for Price: 07 3277 0237

Description

The DTV100 with dual TV outputs and 20m cabling for larger vessels.”

The DTV200 is a new TV antenna solution. It includes the DTV100, a high performance, omni-directional TV antenna providing great reception of the latest digital, terrestrial TV signals while afloat and it also includes a dual TV output amplifier and 20m cable.

The Digital Yacht DTV100's super sensitive design and hi gain amplifier, suck in even the weakest of signals. It's omni-directional too so requires no complicated aligning plus it will also provide a feed for an FM stereo radio. With the dual TV output, you can have two TV on board displaying different channels.

Most countries are now transmitting national free to view digital TV channels, some even in HD, and with the DTV100's sleek 280mm (11?) diameter, high sensitivity, omni-directional antenna design and fully adjustable, high gain, powered amplifier (-7dB to 29dB), you can tune in to all of them with perfect digital reception.

Start taking advantage of free HD digital TV entertainment today and enjoy a few home luxuries on board.
